BlueCross BlueShield of North Carolina

MY 2024 Blue Cross NC Provider Reference Guide

This version of the MY 2024 Blue Cross NC Provider Reference Guide is based on the preliminary HEDIS Specifications. Final HEDIS Specifications are not released by NCQA until March 2024. Blue Cross NC will update the MY 2024 Provider Reference Guide at that time if any changes are needed.

Requirements for Meeting Clinical Goals - Last Updated January 2024

This reference guide is not intended to be a complete guide for all HEDIS® measures and requirements.
For additional details and specifications for HEDIS® measures, please go to https://www.ncqa.org/hedis/measures or contact Blue Cross NC Quality Management at qualitymanagement@bcbsnc.com or 919-765-4809.

MEASURE ABBREVIATION	MEASURE DESCRIPTION	PAGE
	Important Information	3

TABLE OF CONTENTS

HEDIS®: The Healthcare Effectiveness Data and Information Set (HEDIS®) is a registered trademark of NCQA.

Important Information

NCQA will post a comprehensive list of medications and NDC codes to www.ncqa.org on March 31 of the measurement year.

IMPORTANT EXCLUSION INFORMATION

- All exclusions are required.
- All deceased members are required to be excluded, even if there was compliance before death.

IMPORTANT DEFINITIONS

- **Measurement year** – Considered 1/1 to 12/31 unless otherwise stated within measure specifications.
- **Direct Reference Code** – A code included directly within the measure specifications with no associated value set or value set name. Note: Some Direct Reference Codes took the place of previous value sets that were retired due to only having one code.
- **Administrative Measure** – Transaction data or other administrative data are used to identify the eligible population and numerator.
- **Hybrid Measure** – Organizations look for numerator compliance in both administrative and medical record data.
- **IPSD** – Index Prescription Start Date
- **IESD** – Index Episode Start Date

RACE AND ETHNICITY STRATIFICATION INCLUDED MEASURES:

- **AIS-E** – Adult Immunization Status (ECDS)
- **AMR** – Asthma Medication Ratio
- **BCS-E** – Breast Cancer Screening (ECDS)
- **CBP** – Controlling High Blood Pressure
- **COL-E** – Colorectal Cancer Screening (ECDS)
- **FUA** – Follow-up After Emergency Department Visit for Substance Use
- **HBD** – Hemoglobin A1c Control for Patients With Diabetes
- **IET** – Initiation and Engagement of Substance Use Disorder Treatment
- **IMA** – Immunizations for Adolescents
- **POD** – Pharmacotherapy for Opioid Use Disorder
- **PPC** – Prenatal and Postpartum Care
- **WCV** – Child and Adolescent Well-Care Visits
- **WCV** – Well-Child Visits in the First 30 Months of Life

NEW FOR 2024:

- **FUM** – Follow-up After Emergency Department Visit for Mental Illness
- **FUH** – Follow-Up After Hospitalization for Mental Illness
- **PND-E** – Prenatal Depression Screening and Follow-Up
- **PDS-E** – Postpartum Depression Screening and Follow-Up
- **CIS-E** – Childhood Immunization Status Combo 10 Indicator
- **CCS-E** – Cervical Cancer Screening
- **PRS-E** – Prenatal Immunization Status
- **KED** – Kidney Health Evaluation for Patients with Diabetes
- **EED** – Eye Exam for Patients with Diabetes

AAB

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
AAB – Avoidance of Antibiotic Treatment for Acute Bronchitis / Bronchiolitis **Administrative Measure** The percentage of episodes for members 3 months of age and older with a diagnosis of acute bronchitis / bronchiolitis that did **NOT** result in an antibiotic dispensing event. **The Intake Period:** 7/1 of the year prior to measurement year to 6/30 of the measurement year.	Members treated for acute bronchitis / bronchiolitis should **NOT** be prescribed antibiotics unless there are co-morbid conditions or competing diagnoses that require antibiotic therapy. **PRODUCT LINE** Commercial, Marketplace, Medicare Advantage and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical Record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. **Note:** *To avoid inappropriate members being included into the eligible population, submit a claim with all appropriate diagnosis codes including any competing conditions (i.e. cellulitis, pharyngitis) and any co-morbid condition diagnoses. Telehealth visits are allowed for this measure.*

ADD-E

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
ADD-E – Follow-Up Care for Children Prescribed ADHD Medication **ECDS Measure** The percentage of children newly prescribed ADHD medication who had at least 3 follow-up visits within a 10 month period; one needs to be within 30 days of when the medication was dispensed. **The Intake Period:** 12 month window starting 3/1 of the year prior to the measurement year and ending the last calendar day of February of the measurement year.	**Initiation Phase:** The percentage of members 6 – 12 years of age with a prescription dispensed for ADHD medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase. **Continuation and Maintenance Phase:** The percentage of members 6 – 12 years of age with a prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended. Only one of the two visits may be an e-visit or virtual check-in. **PRODUCT LINE** Commercial and Medicaid	**Claims:** • Submit a claim for a follow-up visit with a prescribing provider and the appropriate CPT and ICD-10 ADHD codes within 30 days of staring the medication and then at least two additional visits with a provider in the 9 months following the 30 day visit. **Medical record documentation not applicable.** **Required Exclusions:** • Members in hospice or using hospice services anytime during the measurement year. • Members with a diagnosis of narcolepsy any time during their history through December 31 of the measurement year.

HEDIS Value Set Name	Code Set	Code	Comments
Visit Setting Unspecified	CPT	90791, 90792, 90832, 90833, 90834, 90836, 90837, 90838, 90839, 90840, 90845, 90847, 90849, 90853, 90875, 90876, 99221, 99222, 99223, 99231, 99232, 99233, 99238, 99239, 99252, 99253, 99254, 99255	With an Outpatient POS **OR** POS code 52 **OR** POS code 53 **OR** Telehealth POS code.

Remaining HEDIS Value Set codes can be found in Appendix 7.

AMM

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
AMM – Antidepressant Medication Management **Administrative Measure** The percentage of members 18 years of age and older with a diagnosis of major depression who were treated with antidepressant medication and who remained on the medication treatment for: • 84 days (12 weeks) – Acute Phase. • 180 days (6 months) – Continuation Phase. **The Intake Period:** 5/1 of the year prior to the measurement year to 4/30 of the measurement year.	Members with a diagnosis of major depression will remain on medication treatment for at least 180 days (6 months). **PRODUCT LINE** Commercial, DSNP, Marketplace, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation not applicable.** **Required Exclusions:** • Members in hospice or using hospice services anytime during the measurement year. • Members who did not have an encounter with a diagnosis of major depression during the 121-day period from 60 days prior to the IPSD, through the IPSD and 60 days after the IPSD.

AMR

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
AMR – Asthma Medication Ratio **Administrative Measure** The percentage of members 5 – 64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year.	Members with persistent asthma will receive asthma controller prescriptions that account for at least 50% of their total asthma medications. (Controller medications versus rescue medications.) **PRODUCT LINE** Commercial, Marketplace and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. • Members who had a diagnosis that requires a different treatment approach than members with asthma. • Members who had no asthma controller or reliever medications dispensed during the measurement year.

HEDIS® QUALITY MEASURE

APM-E – Metabolic Monitoring for Children and Adolescents on Antipsychotics

ECDS Measure

The percentage of children and adolescents 1 – 17 years of age who had two or more antipsychotic prescriptions and had metabolic testing.

Three rates are reported:

Percentage of children and adolescents on antipsychotics who received:

- Blood glucose testing.
- Cholesterol testing.
- Blood glucose and cholesterol testing.

CLINICAL GOAL

Children and adolescents who had two or more antipsychotic medication dispensing events during the measurement year will have metabolic testing.

PRODUCT LINE

Commercial and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

Blood Glucose Testing Rate:

- Submit a claim for at least one test for blood glucose or HbA1c.

Cholesterol Testing Rate:

- Submit a claim for at least one test for LDL-C or cholesterol.

Blood Glucose and Cholesterol Testing Rate:

Submit claims for both of the following during the measurement year on the same or different dates of service:

- At least one test for blood glucose or HbA1c.
- At least one test for LDL-C or cholesterol.

Medical record documentation not applicable.

Required Exclusions:

- Members in hospice or using hospice services any time during the measurement year.

HEDIS Value Set Name	Code Set	Code
Glucose Lab Test	CPT	80047, 80048, 80050, 80053, 80069, 82947, 82950, 82951
HbA1c Lab Test	CPT	83036, 83037
HbA1c Lab Test	LOINC	17856-6, 4548-4, 4549-2, 96595-4, 17855-8
HbA1c Test Result or Finding	CPT – CAT-II	3044F, 3046F, 3051F, 3052F
LDL-C Lab Test	CPT	80061, 83700, 83701, 83704, 83721
LDL-C Test Result or Finding	CPT – CAT-II	3048F, 3049F, 3050F
Cholesterol Lab Test	CPT	82465, 83718, 83722, 84478

APP

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
APP – Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics **ECDS Measure** The percentage of children and adolescents 1–17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment.	Children and adolescents aged 1-17 years of age will have psychosocial care as first-line treatment prior to receiving new prescription for antipsychotic medication. **PRODUCT LINE** Commercial, Medicaid	**Claims:** • Submit claim for psychosocial care 4 months prior to the IPSD through the 30 days after the IPSD. **Required Exclusions:** Exclude members who met any of the following during the measurement year: • Members in hospice or using hospice services any time during the measurement year. • One acute inpatient encounter or 2 visits in an outpatient, intensive outpatient, or partial hospitalization with diagnosis of schizophrenia, schizoaffective disorder, bipolar disorder, other psychotic disorder, autism, or other developmental disorder during the measurement year. • An outpatient visit for Behavioral Health. • A community mental health center visit. • Electroconvulsive therapy. • An observation visit, telehealth visit, telephone visit, e-visit, or virtual check-in with POS value set.

HEDIS Value Set Name	Code Set	Code
Psychosocial Care	CPT	90832, 90833, 90834, 90836, 90837, 90838, 90839, 90840, 90845, 90846, 90847, 90849, 90853, 90875, 90876, 90880
Psychosocial Care	HCPCS	G0176, G0177, G0409, G0410, G0411, H0004, H0035, H0036, H0037, H0038, H0039, H0040, H2000, H2001, H2011, H2012, H2013, H2014, H2017, H2018, H2019, H2020, S0201, S9480, S9484, S9485

BCS-E

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
BCS-E – Breast Cancer Screening **ECDS Measure** The percentage of members 50 – 74 years of age who had a mammogram to screen for breast cancer. There is a 27 month look back period from 10/1 two years prior to 12/31 of the current year.	Members between the age of 50 and 74 years will have one or more mammograms at least every 2 years. **PRODUCT LINE** Commercial, Marketplace and Medicaid	**Claims:** • Submit a claim for mammogram any time on or between October 1 two years prior to the measurement period and 12/31 of the measurement year. **Required Exclusions:** • Bilateral mastectomy. • Unilateral mastectomy with a bilateral modifier from the same procedure. • Unilateral mastectomy found in clinical data with bilateral modifier from same procedure. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 years of age and older as of 12/31 of the measurement year with frailty **and** advanced illness. • Members receiving palliative care or hospice services during the measurement year. • Members who had gender-affirming chest surgery with a diagnosis of gender dysphoria any time during the member's history through the end of the measurement period.

HEDIS Value Set Name	Code Set	Code	Comments
Mammography History of Bilateral	CPT	77061, 77062, 77063, 77065, 77066, 77067	
Mastectomy	ICD10CM	Z90.13	Required Exclusion

HEDIS® QUALITY MEASURE

BPD – Blood Pressure Control for Patients with Diabetes

Hybrid Measure

Members 18 – 75 years of age with diabetes (Types 1 and 2) whose BP was adequately controlled (< 140/90) during the measurement year.

CLINICAL GOAL

Members with diabetes will have blood pressure control of < 140/90 mm Hg.

PRODUCT LINE

Commercial, Medicare and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim with the 2 appropriate CPTII codes to report results of the BP at each office visit.

Medical record documentation*:

- A visit note identifying the most recent BP reading (< 140/90mm Hg) during the measurement year on or after the second diagnosis of hypertension.
- If multiple BP measurements occur on the same date, or are noted in the chart on the same date, use the lowest systolic and lowest diastolic reading.

Note: *BP readings taken by the member with a digital cuff and documented in the member's medical record are eligible for use in reporting.*

Required Exclusions:

- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 66 of age and older as of 12/31 of the measurement year with frailty **and** advanced illness.

Medical record documentation is **only accepted for gap closure during the annual HEDIS Medical Record Review.*

HEDIS Value Set Name	Code Set	Code	Comments
Systolic Less Than 140	CPT-CAT-II	3074F	Most recent systolic blood pressure < 130 mm Hg (Systolic Compliant)
Systolic Less Than 140	CPT-CAT-II	3075F	Most recent systolic blood pressure 130-139 mm Hg (Systolic Compliant)
Systolic Blood Pressure	CPT-CAT-II	3077F	Most recent systolic blood pressure ≥ 140 mm Hg (Systolic Non-Compliant)
Diastolic Less Than 90	CPT-CAT-II	3078F	Most recent diastolic blood pressure < 80 mm Hg (Diastolic Compliant)
Diastolic Less Than 90	CPT-CAT-II	3079F	Most recent diastolic blood pressure 80-89 mm Hg (Diastolic Compliant)
Diastolic Blood Pressure	CPT-CAT-II	3080F	Most recent diastolic blood pressure ≥ 90 mm Hg (Diastolic Non-Compliant)

HEDIS® QUALITY MEASURE

CBP – Controlling High Blood Pressure

Hybrid Measure

The percentage of members 18 – 85 years of age who had a diagnosis of hypertension (HTN) and whose BP was controlled during the measurement year.

- BP goal < 140/90 mm Hg

Identify members who had at least two outpatient visits, telephone visits, e-visits or virtual check-ins different dates of service with a diagnosis of hypertension on or between January 1 of the year prior to the measurement year and June 30 of the measurement year.

CLINICAL GOAL

Control of high BP < 140/90 is extremely important to prevent additional cardiovascular conditions.

PRODUCT LINE

Commercial, DSNP, Marketplace, Medicare and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim with the 2 appropriate CPTII codes to report results of the BP at each routine office visit.

Medical record documentation*:

- A visit note identifying the most recent BP reading (< 140/90 mm Hg) during the measurement year on or after the second diagnosis of hypertension.
- If multiple BP measurements occur on the same date, or are noted in the chart on the same date, use the lowest systolic and lowest diastolic reading.

Note: *BP readings taken by the member with a digital cuff and documented in the member's medical record are eligible for use in reporting.*

Required Exclusions:

- Members with evidence of end-stage renal disease, dialysis, nephrectomy or kidney transplant any time during the member's history on or prior to December 31 of the measurement year.
- Members with a diagnosis of pregnancy any time during the measurement year.
- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 66 – 80 years of age and older as of 12/31 of the measurement year with frailty and advanced illness.
- Members 81 years of age and older as of 12/31 of the measurement year with frailty.

Medical record documentation is **only accepted for gap closure during the annual HEDIS Medical Record Review.*

HEDIS® QUALITY MEASURE

CHL – Chlamydia Screening in Women

Administrative Measure

The percentage of women 16 – 24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year.

CLINICAL GOAL

Annual screening for chlamydia is required for all sexually active females ages 16 – 24.

Obtain a urine sample or obtain a direct sample (i.e. cervix, urethra, vagina) for chlamydia culture yearly.

PRODUCT LINE

Commercial, Marketplace and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim for chlamydia screening with appropriate codes.

Medical record documentation:

- A visit note indicating date of service and lab results showing chlamydia screening was performed.

Note: *The two methods to determine sexual activity are pharmacy data (contraceptives) and claims encounter for sexual activity, pregnancy test or pregnancy diagnosis.*

Required Exclusions:

- Members in hospice or using hospice services anytime during the measurement year.

HEDIS Value Set Name	Code Set	Code
Chlamydia Tests	CPT	87110, 87270, 87320, 87490, 87491, 87492, 87810, 0353U

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
CIS – Childhood Immunization Status **Hybrid Measure** The percentage of children 2 years of age who received all of the immunizations listed under the Clinical Goal column.	Children who turn 2 years of age during the measurement year will have the following vaccinations by their 2nd birthday: • 4 DTaP • 3 IPV • 1 MMR • 3 HiB • 3 HepB • 1 VZV • 4 PCV • 1 HepA • 2 or 3 Rotavirus • 2 Flu vaccinations **Combo 7** = Numerator compliant for all except Flu. **Combo 10** = Numerator compliant for all. **Combo 3** = Numerator compliant for all except Hep A, RV, and Flu.	**Claims:** • Submit a claim for all immunizations given. • Report all immunizations to the North Carolina Immunization Registry. **Medical record documentation:** • A visit note indicating the name of the specific antigen and the date of the immunization. • A certificate of immunization prepared by an authorized health care provider or agency including the specific dates and types of immunizations administered. **Required Exclusions:** • Members in hospice or using hospice services anytime during the measurement year. • Members who had any of the following on or before their second birthday: – Severe combined immunodeficiency – Immunodeficiency – HIV – Lymphoreticular cancer, multiple myeloma or leukemia – Intussusception **Note:** *For measure compliance, MMR, HepA, and VZV vaccines should be given between the child's 1st and 2nd birthdays.* For all vaccines the member is considered compliant for the indicator if anaphylaxis to vaccine occurs on or before the 2nd birthday.

HEDIS® QUALITY MEASURE

COA – Care for Older Adults

ECDS Measure

The percentage of adults 66 years and older who had each of the following during the measurement year:

- Medication review.
- Functional status assessment.
- Pain assessment.

CLINICAL GOAL

Medication Review – Either of the following meets criteria:

- Both of the following during the same visit during the measurement year where the provider type is a prescribing practitioner or clinical pharmacist:
  - At least one medication review.
  - The presence of a medication list in the medical record.
- Transitional care management services during the measurement year.

Exclude services provided in an acute inpatient setting.

Functional Status Assessment – At least one functional status assessment during the measurement year. Exclude services provided in an acute inpatient setting.

Pain Assessment – At least one pain assessment during the measurement year. Exclude services provided in an acute inpatient setting.

PRODUCT LINE

DSNP and MMP

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim for services completed with appropriate codes.

Medical record documentation*:

- Medication review conducted by a prescribing practitioner or clinical pharmacist during the measurement year and the presence of a medication list in the medical record.
- Medication list, signed and dated during the measurement year by the appropriate practitioner type.
- Functional status assessment during the measurement year.
- Pain assessment during the measurement year.

Required Exclusion:

- Members in hospice or using hospice services anytime during the measurement year.

Note:

Notation alone of:

- *Pain management plan does not meet criteria.*
- *Pain treatment plan does not meet criteria.*
- *Screening for chest pain or documentation alone of chest pain does not meet criteria.*

Medical record documentation is **only accepted for gap closure during the annual HEDIS Medical Record Review.*

HEDIS® QUALITY MEASURE

COL-E – Colorectal Cancer Screening

ECDS Measure

The percentage of members 45 – 75 years of age who had appropriate screening for colorectal cancer.

CLINICAL GOAL

The member will have one of the following screening tests during the indicated period:

- Fecal occult blood test (FOBT or FIT) between 1/1 and 12/31 of the measurement year.**
- Colonoscopy performed between 1/1 nine (9) years prior to the measurement year and 12/31 of the measurement year.
- Flexible sigmoidoscopy performed between 1/1 four (4) years prior to the measurement year and 12/31 of the measurement year.
- CT colonography performed between 1/1 four (4) years prior to the measurement year and 12/31 of the measurement year.
- Stool DNA (sDNA) with FIT test performed between 1/1 two (2) years prior to the measurement year and 12/31 of the measurement year.

Note: *For Stool DNA (sDNA) with FIT test, please verify with customer service the patient's availability of coverage for the test.*

** *FOBT tests performed on a sample collected from a digital rectal exam do not meet the measure requirements.*

PRODUCT LINE

Commercial, DSNP, Marketplace, Medicaid and Medicare

CRITERIA TO MEET THE GOAL

Submit a claim(s) for any of the following:

- 3 Fecal Occult Blood (FOBT) or 1 Fecal Immunochemical (FIT) test.
- Sigmoidoscopy.
- CT colonography.
- Stool DNA (sDNA) with FIT test.

Medical Record Documentation of:

- FOBT (3) done during the measurement year.
- FIT (1) done during the measurement year.
- Colonoscopy done within 9 years prior to the measurement year and 12/31 of the measurement year.
- Flexible sigmoidoscopy done within 4 years prior to the measurement year and 12/31 of the measurement year.
- CT colonography done within 4 years prior to the measurement year and 12/31 of the measurement year.
- FIT-DNA test done within 2 years prior to the measurement year and 12/31 of the measurement year.
- Documentation of exclusion: colorectal cancer or a total colectomy at any time during the member's history through 12/31 of the measurement year.

Required Exclusions:

- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 66 of age and older as of 12/31 of the measurement year with frailty **and** advanced illness.
- Members who had colorectal cancer or a total colectomy any time during the member's history through December 31 of the measurement year (no longer optional).

COU

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
COU – Risk of Continued Opioid Use **Administrative Measure** The percentage of members 18 years of age and older who have a new episode of opioid use that puts them at risk for continued opioid use. Two rates are reported: 1. The percentage of members with at least 15 days of prescription opioids in a 30-day period. 2. The percentage of members with at least 31 days of prescription opioids in a 62-day period. **Note:** *A lower rate indicates better performance.* Intake Period 11/1 of the year prior to the measurement year to 10/31 of the measurement year.	Identify members who have a risk of continued opioid use. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** Numerator compliance for this measure is based off of pharmacy claims. ≥ **15 Days Covered:** Members who had 15 or more calendar days covered by an opioid medication during the 30-day period beginning on the IPSD through 29 days after the IPSD meet numerator compliance. ≥ **31 Days Covered:** Members who had 31 or more calendar days covered by an opioid medication during the 62-day period beginning on the IPSD through 61 days after the IPSD meet numerator compliance. **Medical record documentation not applicable.** **Required Exclusions:** Members who met at least one of the following at any time 1 year prior to the IPSD through 61 days after the IPSD: • Cancer • Sickle cell disease • Palliative care • Members in hospice or using hospice services any time during the measurement year. • Members who died any time during the measurement year.

CWP

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
CWP – Appropriate Testing for Pharyngitis **Administrative Measure** The percentage of members 3 years of age and older who were diagnosed with pharyngitis, dispensed an antibiotic and received a Group A streptococcus (strep) test for the episode in the 7 day period from 3 days prior to the episode date through 3 days after the episode date. **The Intake Period:** 7/1 of the prior year to 6/30 of the measurement year.	Members 3 years of age and older diagnosed with pharyngitis / tonsillitis must receive a strep test prior to receiving a prescription for antibiotics. **PRODUCT LINE** Commercial, Marketplace, Medicare and Medicaid	**Claims:** • Submit a claim for a group A step test with appropriate code. • Submit a claim for all additional competing diagnoses that would require antibiotic therapy. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. **Note:** *Other family members with strep and parental refusal are not exclusions to this measure.* **HEDIS Value Set Name** / **Code Set** / **Code** Group A Strep Tests / CPT / 87070, 87071, 87081, 87430, 87650, 87651, 87652, 87880

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
DAE – Use of High-Risk Medications in Older Adults **Administrative Measure** The percentage of Medicare members 67 years of age and older who had at least two dispensing events for the same high-risk medication. Measure includes: • The percentage of Medicare members 67 years of age and older who had at least two dispensing events for high-risk medications to avoid from the same drug class. • The percentage of Medicare members 67 years of age and older who had at least two dispensing events for high-risk medications to avoid from the same drug class, except for appropriate diagnoses. The measure reflects potentially inappropriate medication use in older adults, both for medications where any use is inappropriate (Rate 1) and for medications where use under all but specific indications is potentially inappropriate (Rate 2). **Note:** *A lower rate represents better performance.*	High-risk medications will **NOT** be prescribed unless absolutely necessary and when appropriate diagnoses are present. **PRODUCT LINE** DSNP and Medicare	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation not applicable.** **Required Exclusions:** • Members receiving palliative care or hospice services during the measurement year.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
DDE – Potentially Harmful Drug-Disease Interactions in Older Adults **Administrative Measure** The percentage of Medicare members 65 years of age and older who have evidence of an underlying disease, condition, or health concern and who were dispensed an ambulatory prescription for a potentially harmful medication, concurrent with or after the diagnosis. **Three rates are reported:** **Drug-Disease Interactions:** A history of falls and a prescription for antiepileptics, antipsychotics, benzodiazepines, non-benzodiazepine hypnotics or antidepressants (SSRIs, tricyclic antidepressants and SNRIs). An accidental fall or hip fracture* on or between January 1 of the year prior to the measurement year and December 1 of the measurement year. * Hip fractures are used as a proxy for identifying accidental falls. **Drug-Disease Interactions:** Dementia and a prescription for antipsychotics, benzodiazepines, non-benzodiazepine hypnotics, tricyclic antidepressants, or anticholinergic agents. **Drug-Disease Interactions:** Chronic kidney disease and prescription for Cox-2 selective NSAIDs or nonaspirin NSAIDs. Measurement period 1/1 of the year prior to the measurement year and 12/1 of the measurement year. **Note:** *A lower rate indicates better performance for all rates.*	Potentially harmful prescriptions will **NOT** be prescribed unless absolutely necessary and when an appropriate diagnosis is present. **PRODUCT LINE** DSNP and Medicare	**Claims:** • Numerator compliance for this measure is based on claims data for pharmacy claims. **Medical record documentation not applicable.** **Required Exclusions:** • For all three rates: Members receiving palliative care or hospice services during the measurement year. • For Rate 1: Diagnosis of psychosis, schizophrenia, schizoaffective disorder, bipolar disorder, major depressive disorder, or seizure disorder on or between January 1 of the year prior to the measurement year and December 1 of the measurement year. • For Rate 2: Diagnosis of psychosis, schizophrenia, schizoaffective disorder or bipolar disorder, between January 1 of the year prior to the measurement year and December 1 of the measurement year.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
EED – Eye Exam for Patients with Diabetes **Hybrid Measure** Members 18 – 75 years of age with diabetes (Types 1 and 2) who had a retinal eye exam.	Member will have: • A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year. • A *negative* retinal or dilated eye exam (negative for retinopathy) by an eye care professional in the **year prior** to the measurement year. • Bilateral eye enucleation anytime during the member's history through December 31 of the measurement year. **PRODUCT LINE** Commercial, Marketplace, Medicare and Medicaid	Eye exam from year prior to measurement year **MUST** be negative for numerator compliance. **Claims:** • If you have or reviewed a report form the patient's ophthalmologist or optometrist submit a claim with appropriate CPT II code. **Medical record documentation of one of the following:** 1. A note or letter indicating that an ophthalmoscopic exam was completed by an eye care professional, the date when the procedure was performed, and the results. 2. A chart or photograph indicating the date the fundus photography was performed and one of the following: • Evidence that results were read by an eye care professional. • Evidence results were read by a qualified reading center that operates under the direction of a medical director who is a retinal specialist. 3. Evidence results were read by a system that provides an artificial intelligence (AI) interpretation. 4. Bilateral eye enucleation or acquired absence of both eyes. 5. Negative retinal or dilated exam by an eye care professional in the year prior to the measurement year. **Required Exclusions:** • Members receiving palliative care or hospice services during the measurement year. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 of age and older as of 12/31 of the measurement year with frailty **and** advanced illness.

HEDIS® QUALITY MEASURE

FUA – Follow-Up After Emergency Department Visit for Substance Use

Administrative Measure

The percentage of emergency department (ED) visits among members age 13 years and older with a principal diagnosis of Substance Use Disorder (SUD), or any diagnosis of drug overdose, for which there was follow-up.

Two rates are reported:

7-Day Follow-Up: The percentage of ED visits where the member received follow-up or a pharmacotherapy dispensing event within 7 days of the ED visit.

30-Day Follow-Up: The percentage of ED visits where the member received follow-up or a pharmacotherapy dispensing event within 30 days of the ED visit.

CLINICAL GOAL

7-Day Follow-up:
Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 7 days of ED visit.

30-Day Follow-up:
Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 30 days of ED visit.

PRODUCT LINE

Commercial, Medicare and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim, with the appropriate provider and coding, for a follow-up service within 7 days after discharge and 30 days after discharge.

Visits that will meet follow-up criteria:

- Outpatient
- Intensive outpatient encounter or partial hospitalization
- Non-residential substance abuse treatment facility
- Community mental health center
- Peer support service
- Opioid treatment service that bulls monthly or weekly
- Telehealth
- Telephone
- E-visit or virtual check-in

Medical record documentation not applicable.

Required Exclusion:

- Members in hospice or using hospice services any time during the measurement year.

HEDIS® QUALITY MEASURE

FUH – Follow-Up After Hospitalization for Mental Illness

Administrative Measure

The percentage of members 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health provider.

Two rates are reported:

7-Day Follow-Up: A follow-up visit with a mental health provider within 7 days after discharge.

30-Day Follow-Up: A follow-up visit with a mental health provider within 30 days after discharge.

The denominator for this measure is based on discharges, not on members. All discharges are included on or between 1/1 to 12/1 of the measurement year.

CLINICAL GOAL

7-Day Follow-up:

Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 7 days of ED visit.

30-Day Follow-up:

Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 30 days of ED visit.

Note: *Follow up with a PCP does not meet the measure. The visit must be with a* ***mental health practitioner****.*

PRODUCT LINE

Commercial, DSNP, Marketplace, Medicare and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim, with the appropriate provider and coding, for a follow-up service within 7 days after discharge and 30 days after discharge.

Visits that will meet follow-up criteria:

- Outpatient
- Intensive outpatient encounter or Partial hospitalization
- Community mental health center visit
- Electroconvulsive therapy
- Telehealth
- Telephone
- Transitional care management services
- Psychiatric collaborative care management

Medical record documentation not applicable.

Required Exclusion:

- Members in hospice or using hospice services anytime during the measurement year.

The denominator for this measure is based on ED visits, not on members. All eligible ED visits are included on or between 1/1 – 12/1 of the measurement year.	**7-Day Follow-up:** Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 7 days of ED visit. **30-Day Follow-up:** Members who had an ED visit for substance use disorder or drug overdose will be seen by any practitioner or have a pharmacotherapy dispensing event within 30 days of ED visit. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** • Submit a claim, with the appropriate coding, for a follow-up service within 7 days after discharge and 30 days after discharge. **Visits, when paired with appropriate diagnosis, that will meet follow-up criteria:** • Outpatient • Intensive outpatient encounter or partial hospitalization • Community mental health center • Electroconvulsive therapy • Telehealth • Telephone • E-visit or virtual check-in **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. HEDIS Value Set codes can be found in Appendix 7.

GSD – Glycemic Status Assessment for Patients with Diabetes

Hybrid Measure – The percentage of members 18 – 75 years of age with diabetes (types 1 and 2) whose most recent glycemic status (hemoglobin A1c [HbA1c] or glucose management indicator [GMI] was at the following levels dring the measurement year:

- Glycemic Status < 8.0%
- Glycemic Status > 9.0%

HEDIS® QUALITY MEASURE

Glycemic Status < 8.0%.

Identify the most recent glycemic status assessment (HbA1c or GMI) during the measurement year. The member is numerator compliant if the most recent glycemic status assessment has a result of < 8.0%. The member is not numerator compliant if the result of the most recent glycemic status assessment is ≥ 8.0% or is missing a result, or if a glycemic status assessment was not done during the measurement year.

CLINICAL GOAL

Members have a HbA1c or GMI test and value of < 8% recorded during the measurement year.

PRODUCT LINE

Commercial, Medicaid, Medicare

CRITERIA TO MEET THE GOAL

Claims:

Submit a claim for HbA1c or GMI with appropriate coding.

Medical Record Documentation of:

Date and value of most recent HbA1C or GMI test result of the measurement year.

Required Exclusions:

- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 66 years or age and older as of 12/31 of the measurement year with frailty **and** advanced illness.

HEDIS Value Set Name	Code Set	Code	Comments
HbA1c Lab Test	CPT	83036, 83037	Most recent and with CPT-CAT-II code (without a 1P, 2P, 3P, or 8P modifier).
HbA1c Lab Test	LOINC	17855-8, 17856-6, 4548-4, 4549-2, 96595-4, 97506-0	Most recent and with CPT-CAT-II code (without a 1P, 2P, 3P, or 8P modifier).
HbA1c Level Greater Than or Equal to 8.0	CPT-CAT-II	3046F	Most recent hemoglobin A1c level Greater Than 9.0% (Non-Compliant).
HbA1c Level Greater Than or Equal to 8.0	CPT-CAT-II	3052F	Most recent hemoglobin A1c (HbA1c) level Greater Than or Equal to 8.0% and Greater Than or Equal to 9.0% (Non-Compliant).
HbA1c Level Greater Than or Equal to 8.0	CPT-CAT-II	3044F	Most recent hemoglobin A1c (HbA1c) level Less Than 7.0% (Compliant).
HbA1c Level Greater Than or Equal to 8.0	CPT-CAT-II	3051F	Most recent hemoglobin A1c (HbA1c) level Greater Than or Equal to 7.0% and Less Than 8.0% (Compliant).

GSD – Glycemic Status Assessment for Patients with Diabetes

Hybrid Measure – The percentage of members 18 – 75 years of age with diabetes (types 1 and 2) whose most recent glycemic status (hemoglobin A1c [HbA1c] or glucose management indicator [GMI] was at the following levels dring the measurement year:

- Glycemic Status < 8.0%
- Glycemic Status > 9.0%

Measurement year 1/1 to 12/31 of the measurement year.

HEDIS® QUALITY MEASURE

Glycemic Status > 9.0%.

Identify the most recent glycemic status assessment (HbA1c or GMI) during the measurement year. The member is numerator compliant if the most recent glycemic status assessment has a result of > 9.0%. The member is not numerator compliant if the result of the most recent glycemic status assessment is ≤ 9.0% or is missing a result, or if a glycemic status assessment was not done during the measurement year.

Note: This is an inverse measure rate. A lower reported rate indicates better performance for this indicator (i.e., low rates of Glycemic Status > 9% indicate better care). **However, on reporting given to Providers Blue Cross NC chooses to reflect this rate as the actual clinical goal of ≤ 9% to align reporting of both Glycemic Status rates and reduce confusion of the clinical goal.**

CLINICAL GOAL

Members have a HbA1c or GMI test and value of ≤ 9% recorded during the measurement year.

PRODUCT LINE

Commercial, Medicaid, Medicare

CRITERIA TO MEET THE GOAL

Claims:

HDO

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
HDO – Use of Opioids at High Dosage **Administrative Measure** The percentage of members 18 years of age and older who received prescription opioids at a high dosage (average morphine milligram equivalent dose [MME] ≥ 90) for ≥ 15 days during the measurement year. **Note:** *A lower rate indicates better performance.*	Assesses potentially high-risk opioid analgesic prescribing practices. **PRODUCT LINE** Commercial, Medicare and Medicaid	Members whose average MME was ≥ 90 meet the numerator criteria. **Medical record documentation not applicable.** **Required Exclusions:** • Cancer • Sickle cell disease • Palliative care • Members in hospice or using hospice services.

IET

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
IET– Initiation and Engagement of Substance Use Disorder Treatment **Administrative Measure** New Substance Use Disorder (SUD) episodes that result in treatment initiation and engagement. Ages 13 and older as of the SUD episode date. **<u>Two rates are reported:</u>** **<u>Initiation of SUD Treatment:</u>** The percentage of new SUD episodes that result in treatment initiation through inpatient SUD admission, outpatient visit, intensive outpatient encounter, partial hospitalization, telehealth visit or medication treatment within 14 days. **<u>Engagement of SUD Treatment:</u>** The percentage of new SUD episodes that have evidence of treatment engagement within 34 days of initiation. **The Intake Period:** 11/15 of the year prior to the measurement year to 11/14 of the measurement year.	**Initiation phase** – Members will schedule a follow-up visit within 14 days of the SUD diagnosis. **Continuation phase** – Members will have at least two of the following on the day after the initiation encounter through 34 days after the initiation event: • Engagement visit. • Engagement medication treatment event. **Note:** *If a member is non-compliant with Initiation within 14 days the member is then non-compliant for both Initiation and Engagement.* **PRODUCT LINE** Commercial, Marketplace, Medicare and Medicaid	**Claims:** • Submit a claim, with the appropriate coding, for follow-up services within the appropriate time frame. **Visits / Events that will meet follow-up criteria:** • An acute or nonacute inpatient admission with diagnosis of alcohol abuse and dependence, opioid abuse and dependence and other drug abuse and dependence. • An outpatient visit. • Intensive outpatient encounter or partial hospitalization. • A non-residential substance abuse treatment facility visit. • A community mental health center visit. • A telehealth visit. • Substance use disorder service. • Telephone visit. • E-visit or virtual check-in. • An acute or nonacute inpatient. • Inpatient stay for medically managed withdrawal. **Either of the following meets criteria for a medication treatment event:** • Alcohol use disorder and alcohol use disorder medication treatment dispensing event. • Opioid use disorder medication treatment dispensing event. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. HEDIS Value Set codes can be found in Appendix 7.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
IMA – Immunizations for Adolescents **Hybrid Measure** The percentage of adolescents 13 years of age who had the vaccinations listed under the Clinical Goal column.	By the 13th birthday, members will have received: • 1 meningococcal vaccine on or between 11th and 13th birthdays. • 1 Tdap vaccine on or between 10th and 13th birthdays. • 2 or 3 HPV vaccines with different dates of service on or between the member's 9th and 13th birthdays. If reporting only 2 vaccines, there must be at least 146 days between the first and second dose of the HPV vaccine. **Combo 1** = Numerator compliant for both meningococcal and Tdap. **Combo 2** = Numerator compliant for all.	**Claims:** • Submit a claim for all vaccinations members receive. • Report all Immunizations to the North Carolina Immunization Registry. **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. **Medical record documentation of:** • A visit note indicating the name of the specific antigen and the date of the immunization. • A certificate of immunization prepared by an authorized health care provider or agency, including the specific dates and types of immunizations administered. **Note:** *A member is numerator compliant if:* • *Anaphylaxis due to the meningococcal, tetanus, diphtheria, pertussis or HPV vaccine occurs any time on or before the 13th birthday meets criteria for the measure.* • *Encephalitis due to the tetanus, diphtheria or pertussis vaccine occurs any time on or before the 13th birthday meets criteria for the measure.*

HEDIS® QUALITY MEASURE

KED – Kidney Health Evaluation for Patients with Diabetes

Administrative Measure

Members 18 – 85 years of age with diabetes (Type 1 and Type 2) who received a kidney health evaluation during the measurement year.

CLINICAL GOAL

Kidney Health Evaluation:

Member received both an eGFR and a uACR.

- eGFR – Estimated Glomerular Filtration Rate.
- uACR – at least one defined by either of the following:
  - Both a quantitative urine albumin test and a urine creatinine test with service dates four days or less apart.
  - A urine albumin creatinine ratio lab test.

PRODUCT LINE

Commercial, Marketplace, Medicare and Medicaid

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim for eGFR **AND** both a quantitative urine albumin test and a urine creatinine test **OR** submit a claim for a urine albumin creatinine ratio lab test.

Medical record documentation not applicable.

Required Exclusions:

- ESRD
- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 66 years of age and older as of 12/31 of the measurement year with frailty **and** advanced illness.
- Members 81 years of age and older as of 12/31 of the measurement year with frailty during the measurement year.

HEDIS® QUALITY MEASURE

LBP – Use of Imaging Studies for Low Back Pain

Administrative Measure

The percentage of members 18 – 75 years of age with a primary diagnosis of low back pain who did **NOT** have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis.

The Intake Period: 1/1 to 12/3 of the measurement year.

This measure is reported as an inverted rate. A higher score indicates appropriate treatment of low back pain.

CLINICAL GOAL

Members 18 – 75 years will **NOT** receive imaging studies within 28 days of the initial diagnosis of low back pain. ***This includes a plain X-ray.***

Note: *Consider referral for physical therapy evaluation before X-rays are ordered.*

PRODUCT LINE

Commercial, Marketplace, Medicaid and Medicare

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim with a code for low back pain with **first symptom** of low back pain.

Medical record documentation not applicable.

Required Exclusions*:

- Cancer or a history of cancer
- Fragility fracture
- HIV
- Hospice
- IV drug abuse
- Lumbar surgery
- Major organ transplant
- Neurologic impairment
- Osteoporosis
- Palliative care
- Prolonged use of Corticosteroids
- Recent trauma
- Spinal infection
- Spondylopathy

* Please see specification for the time frame for an exclusion.

HEDIS® QUALITY MEASURE

OMW – Osteoporosis Management in Women Who Had a Fracture

Administrative Measure

The percentage of women 67 – 85 years of age who suffered a fracture and had either a bone mineral density (BMD) test or prescription for a drug to treat osteoporosis in the six months after the fracture.

The Intake Period: 7/1 of the prior year to 6/30 of the measurement year.

CLINICAL GOAL

Members 67 – 85 years of age, who had a fracture, will have a BMD test or a prescription for a drug to treat osteoporosis within 6 months of the date of fracture.

Note: *Consider BMD testing every 2 years in this age group.*

PRODUCT LINE

DSNP and Medicare

CRITERIA TO MEET THE GOAL

Claims:

- Submit a claim for BMD testing within 6 months of a fracture.
- Numerator compliance for medication to treat osteoporosis is based off of pharmacy claims.

Medical Record documentation:

- A visit note with evidence of BMD test in the appropriate timeframe.
- A visit note with evidence of fill or dispense date of medication given within the appropriate timeframe.

Required Exclusions:

- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 67 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.
- Members 67 – 80 years of age and older as of 12/31 of the measurement year with frailty and advanced illness.
- Members 81 years of age and older as of 12/31 of the measurement year with frailty.

PBH

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
PBH – Persistence of Beta-Blocker Treatment After a Heart Attack **Administrative Measure** The percentage of members 18 years of age and older who were hospitalized and discharged with a diagnosis of AMI and who remained on beta-blocker treatment for six months after discharge. **The Intake Period:** 7/1 of the prior year to 6/30 of the measurement year.	Members 18 years of age and older with a new diagnosis of AMI will remain on beta-blocker treatment for six months after the hospital discharge. **Note:** *Consider 90 day supply or refills x 6 if appropriate.* **PRODUCT LINE** Commercial, DSNP, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. • At least 135 days of treatment with beta-blockers during the 180-day measurement interval. **Medical record documentation not applicable.** **Required Exclusions:** • Asthma • Hypotension • Heartblock > 1 degree • Sinus bradycardia • COPD • Chronic respiratory due to inhaled fumes / vapors • Intolerance or allergy to beta-blocker therapy • Members in hospice or using hospice services anytime during the measurement year. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 – 80 years of age and older as of 12/31 of the measurement year with frailty **and** advanced illness. • Members 81 years of age and older as of 12/31 of the measurement year with frailty. • Member with a medication dispensing event that indicates contraindication to beta-blocker therapy. **Required Asthma Medication Exclusions:**

Description	Prescription	
Bronchodilator combinations	Budesonide-formoterol	Fluticasone-salmeterol
	Fluticasone-vilanterol	Formoterol-mometasone
Inhaled corticosteroids	Beclomethasone	Flunisolide
	Budesonide	Fluticasone
	Ciclesonide	Mometasone

PCE

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
PCE – Pharmacotherapy Management of COPD Exacerbation **Administrative Measure** The percentage of COPD exacerbations for members 40 years of age and older who had an acute inpatient discharge or ED visit and were dispensed appropriate medications. **Two rates are reported:** 1. Systemic corticosteroid dispensed within 14 days of discharge date. 2. Bronchodilator dispensed on or within 30 days of discharge date. **The Intake Period:** 1/1 to 11/30 of the measurement year.	Assess if member was given appropriate medication prescription at the time of discharge **AND** has filled the prescription **AND** is taking medications as prescribed. Prescribe appropriate systemic corticosteroid within 14 days of the discharge date and bronchodilator within 30 days of discharge **IF** member was not given prescription at the time of discharge. **PRODUCT LINE** Commercial, DSNP, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. – For a high intensity or moderate intensity statin medication during the measurement year. – For high intensity or moderate intensity statin medication throughout the measurement year that will total 80% compliance. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year.

PCR

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
PCR – Plan All-Cause Readmissions For members 18 years of age and older, the number of acute inpatient and observation stays during the measurement year that were followed by an unplanned acute readmission for any diagnosis within 30 days and the predicted probability of an acute readmission. **Note:** *For Commercial and Medicaid, report only members 18 – 64 years of age.* **Event / diagnosis date:** 1/1 to 12/1 of the measurement year.	Members will not have unnecessary / avoidable readmissions. This is a risk adjusted measure that calculates 30 day readmission rates utilizing the following components: • Number of discharges – denominator • Number of 30-day readmissions – numerator • Rate = (numerator / expected number of readmissions) • Global rate • Expected readmission probability is calculated with each discharge **PRODUCT LINE** Commercial, DSNP, Marketplace, Medicare and Medicaid **Note:** *Per General Guideline Members With Dual Enrollment, members with dual commercial and Medicaid enrollment may only be reported in the commercial product line. Members with dual Medicaid/Medicare enrollment "dual eligible" and with Medicare-Medicaid (MMP) enrollment may only be reported in the Medicare product line.*	**This is a risk-adjusted utilization measure.** **Medical record documentation is not applicable.** **Required Exclusion:** • Members in hospice are excluded from the eligible population. **Exclude acute hospitalizations for the following reasons:** • Pregnancy • A principle diagnosis for a perinatal condition originating in the perinatal period, on the discharge claim. • Planned admission; chemotherapy, rehabilitation, an organ transplant or a potentially planned procedure without an acute diagnosis. • Outliers: – MA member with 4 or more IHS. – Commercial member with 3 or more IHS. – The member died during stay. ***IHS (Index Hospital Stay):*** *An acute inpatient or observation stay with a discharge on or between January 1 and December 1 of the measurement year, as identified in the denominator.* **Tips for success:** *Ensure proper HCC coding on all members. Having members coded to the highest specificity will help capture the complexity of a member.*

POD

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
POD – Pharmacotherapy for Opioid Use Disorder **Administrative Measure** The percentage of Opioid Use Disorder (OUD) pharmacotherapy events that lasted at least 180 days among members 16 years of age and older with a diagnosis of OUD and a new OUD pharmacotherapy event. **The Intake Period:** 7/1 of the prior year to 6/30 of the measurement year.	Members will have OUD pharmacotherapy for 180 or more days without a gap in treatment of 8 or more consecutive days. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation is not applicable.** **Required Exclusion:** • Members in hospice or using hospice services any time during the measurement year.

PPC

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
PPC – Prenatal and Postpartum Care **Hybrid Measure** **Timeliness of Prenatal Care** The percentage of deliveries that received a prenatal visit in the first trimester. **Postpartum Care** The percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery. **The Intake Period:** 10/8 of the prior year to 10/7 of the measurement year.	Members will receive a prenatal visit in the first trimester of pregnancy (or within 42 days of enrollment in Blue Cross NC plan). Members will receive a postpartum visit with their provider between day 7 and day 84 postpartum. **PRODUCT LINE** Commercial, Marketplace and Medicaid	**Claims:** • Submit claim for prenatal and postpartum visit with appropriate coding. • **For Global Billing** – You **must** submit an additional claim with the dates of the prenatal and postpartum visits. Refer to Corporate Reimbursement Policy. **Medical record documentation:** • Date service rendered • Service rendered • EDC or LMP • Date of Delivery **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year. HEDIS Value Set codes can be found in Appendix 7.

HEDIS® QUALITY MEASURE

PRS-E – Prenatal Immunization Status

ECDS Measure

The percentage of deliveries in the measurement period in which members had received influenza and tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccinations.

The denominator for this measure is based on deliveries, not on members.

Intake Period: 28 days prior to the delivery date through the delivery date.

CLINICAL GOAL

Members who have deliveries will receive influenza, tetanus, diphtheria toxoids and acellular vaccinations.

PRODUCT LINE

Commercial and Medicaid

CRITERIA TO MEET THE GOAL

Influenza:

- Deliveries where members received an adult influenza vaccine on or between July 1 of the year prior to the measurement period and the delivery date, or
- Deliveries where members had anaphylaxis due to the influenza vaccine on or before the delivery date.

Tdap:

- Deliveries where members received at least one Tdap vaccine during the pregnancy, or
- Deliveries where members had any of the following:
  - Anaphylaxis due to the diphtheria, tetanus or pertussis vaccine on or before the delivery date.
  - Encephalitis due to the diphtheria, tetanus, or pertussis vaccine on or before the delivery date.

Required Exclusions:

- Deliveries that occurred at less than 37 weeks gestation.
- Deliveries in which members were in hospice or using hospice services any time during the measurement year.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
SAA – Adherence to Antipsychotic Medications for Individuals with Schizophrenia **Administrative Measure** The percentage of members 18 years of age and older during the measurement year with schizophrenia or schizoaffective disorder who were dispensed and remained on an antipsychotic medication for at least 80% of their treatment period.	Members will achieve 80% adherence for their antipsychotic medications during the measurement year. **Adherence defined as:** A proportion of days covered (PDC) at 80% or over for antipsychotic medication(s) during the measurement period. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation is not applicable.** **Required Exclusions:** Exclude members who met any of the following during the measurement year: • A diagnosis of dementia • Members in hospice or using hospice services any time during the measurement year. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 years of age and older as of 12/31 of the measurement year with frailty and advanced illness. • Members 81 years of age and older as of 12/31 of the measurement year with frailty during the measurement year. • Did not have at least two antipsychotic medication dispensing events.

HEDIS® QUALITY MEASURE

SNS-E – Social Need Screening and Intervention

ECDS Measure

The percentage of members who were screened, using prespecified instruments, at least once during the measurement period for unmet food, housing and transportation needs, and received a corresponding intervention if they screened positive.

- *Food Screening.* The percentage of members who were screened for food insecurity.
- *Food Intervention.* The percentage of members who received a corresponding intervention within 30 days (1 month) of screening positive for food insecurity.
- *Housing Screening.* The percentage of members who were screened for housing instability, homelessness or housing inadequacy.
- *Housing Intervention.* The percentage of members who received a corresponding intervention within 30 days (1 month) of screening positive for housing instability, homelessness or housing inadequacy.
- *Transportation Screening.* The percentage of members who were screened for transportation insecurity.
- *Transportation Intervention.* The percentage of members who received a corresponding intervention within 30 days (1 month) of screening positive for transportation insecurity.

CLINICAL GOAL

Complete food, housing, and transportation screenings on all members; provide an appropriate intervention which includes assistance, assessment, counseling, coordination, education, evaluation of eligibility, provision or referral for a positive screening in any category.

PRODUCT LINE

Commercial, Medicaid and Medicare

CRITERIA TO MEET THE GOAL

An intervention corresponding to the type of need identified on or up to 30 days after the date of the first positive screening during the measurement period.

Interventions may include any of the following categories: Assistance, assessment, counseling, coordination, education, evaluation of eligibility, provision, or referral.

Note: *Only screenings documented using the LOINC codes specified in the SNS-E measure count toward the measure's screening numerators. Please ask your QMC for a list of specific screening coding.*

Required Exclusions:

- Members who use hospice services or elect to use a hospice benefit any time during the measurement period.
- Members receiving palliative care or hospice services during the measurement year.
- Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
SPC – Statin Therapy for Patients With Cardiovascular Disease **Administrative Measure** The percentage of males 21 – 75 years of age and females 40 – 75 years of age during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria: **Two rates are reported:** **Received Statin Therapy:** Members who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year. **Statin Adherence 80%*:** Members who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period. *Adherence is not applicable to Medicare	Members identified as having clinical atherosclerotic cardiovascular disease (ASCVD) will be prescribed and then maintain 80% adherence on a statin medication. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** • Numerator compliance for this measure is based off of pharmacy claims. **Medical record documentation not applicable.** **Required Exclusions:** • Pregnancy diagnosis in the measurement year or the year prior. • IVF – in the measurement year or the year prior. • ESRD in the measurement year or the year prior. • Dialysis during the measurement year or year prior to the measurement year. • Dialysis during the measurement year or year prior to the measurement year. • Dispensed at least one prescription for clomiphene in the measurement year or the year prior. • Cirrhosis in the measurement year or the year prior. • Myalgia, myositis, myopathy or rhabdomyolysis during the measurement year. • Members receiving palliative care or hospice services during the measurement year. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 years of age and older as of 12/31 of the measurement year with frailty **and** advanced illness.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
SPD – Statin Therapy for Patients With Diabetes **Administrative Measure** The percentage of members 40 – 75 years of age during the measurement year with diabetes but do not have clinical atherosclerotic cardiovascular disease (ASCVD) who met the following criteria: **Two rates are reported:** **Received Statin Therapy:** Members who were dispensed at least one statin medication of any intensity during the measurement year. **Statin Adherence 80%:** Members who remained on a statin medication of any intensity for at least 80% of the treatment period.	Members identified as having diabetes who do not have atherosclerotic cardiovascular disease (ASCVD) will be prescribed and then maintain 80% adherence on a statin medication. **PRODUCT LINE** Commercial, Medicare and Medicaid	**Claims:** • Receipt of pharmacy claims for a statin medication during the measurement year. • Receipt of pharmacy claims for a statin medication throughout the measurement year that will total 80% compliance. **Medical record documentation not applicable.** **Required Exclusions:** • Members with at least one of the following during the year prior to measurement year: MI, CABG, PCI, or other revascularization. • Members with diagnosis of pregnancy during the measurement year or the year prior. • Dispensed at least one prescription for clomiphene during the measurement year or the year prior. • ESRD diagnosis or dialysis during the measurement year or the year prior. • Cirrhosis during the measurement year or the year prior. • Myalgia, myositis, myopathy or rhabdomyolysis during the measurement year. • Palliative care. • Members in hospice or using hospice services anytime during the measurement year. • Medicare members 66 years of age and older as of 12/31 of the measurement year who are in an I-SNP or living long-term in an institution any time during the measurement year. • Members 66 years of age and older as of 12/31 of the measurement year with frailty **and** advanced illness. • IVF during the measurement year or year prior to the measurement year. • Dialysis during the measurement year or year prior. • Members who had at least one encounter with a diagnosis of IVD during the measurement year or the year prior.

TRC – Transitions of Care
Hybrid Measure – Members 18 years and older as of December 31 of the measurement year who had each of the following:
Medication Reconciliation Post-Discharge, Notification of Inpatient Admission, Receipt of Discharge Information, and Patient Engagement After Inpatient Admission.
Note: The denominator for this measure is based on discharges, not on members.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
TRC – Transitions of Care **MRP – Medication Reconciliation Post-Discharge** **Hybrid Measure** The percentage of discharges for members 18 years of age and older who had documentation of medication reconciliation post-discharge. **Eligible Population Event –** An acute or non-acute inpatient discharge on or between 1/1 and 12/1 of the measurement year.	Medication reconciliation conducted on the date of discharge through 30 days after discharge (31 total days). **Note:** • *This measure assesses whether medication reconciliation occurred. It does not attempt to assess the quality of the medication list documented in the medical record or the process used to document the most recent medication list in the medical record.* • *Medication reconciliation must be conducted by a prescribing practitioner, clinical pharmacist, registered nurse or physician assistant.* **PRODUCT LINE** DSNP and Medicare	**Claims:** • Submit a claim with a medication reconciliation visit code. **Medical Record Documentation:** • Documentation of any of the following meet criteria: – The current medications with a notation that the provider reconciled the current and discharge medications. – The current medications with a notation that references the discharge medications. – The member's current medications with a notation that the discharge medications were reviewed. – A current medication list, a discharge medication list and notation that both lists were reviewed on the same date of service. – The current medications with evidence that the member was seen for post-discharge hospital follow-up with evidence of medication reconciliation or review. Evidence that the member was seen for post-discharge hospital follow-up requires documentation that indicates the provider was aware of the member's hospitalization or discharge. – Noted in the discharge summary that the discharge medications were reconciled with the most recent medication list in the outpatient medical record. There must be evidence that the discharge summary was filed in the outpatient chart on the date of discharge through 30 days after discharge (31 total days). – That no medications were prescribed or ordered upon discharge. **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year.

TRC

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
TRC – Notification of Inpatient Admission **Hybrid Measure** Documentation of receipt of notification of inpatient admission on the day of admission or through 2 days after the admission (3 total days). **Eligible Population Event –** An acute or non-acute inpatient discharge on or between 1/1 and 12/1 of the measurement year.	Documentation in the outpatient medical record must include evidence of receipt of notification of inpatient admission on the day of admission through 2 days after admission. The documentation must include evidence of the date when the documentation was received. **PRODUCT LINE** DSNP and Medicare	**Medical record documentation, any of the following meet criteria:** • Communication between inpatient providers or staff and the member's PCP or ongoing care provider. • Communication about admission between emergency department and the member's PCP or ongoing care provider. • Communication about admission to the member's PCP or ongoing care provider: – Through a health information exchange; an automated admission, or discharge and transfer (ADT) alert system. – Through a shared electronic medical record (EMR) system. – From the member's health plan. • Indication: – That the member's PCP or ongoing care provider admitted the member to the hospital. – That a specialist admitted the member to the hospital and notified the member's PCP or ongoing care provider. – That the PCP or ongoing care provider placed orders for tests and treatments any time during the member's inpatient stay. • Documentation that the PCP or ongoing care provider performed a preadmission exam or received communication about a planned inpatient admission. **Required Exclusion:** • Members in hospice or hospice services anytime during the measurement year.

TRC

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
TRC – Receipt of Discharge Information **Hybrid Measure** Documentation of receipt of discharge information on the day of discharge through 2 days after the discharge (3 total days). **Eligible Population Event –** An acute or non-acute inpatient discharge on or between 1/1 and 12/1 of the measurement year.	Documentation in the outpatient medical record must include evidence of receipt of discharge information on the day of discharge through 2 days after the discharge with evidence of the date when the documentation was received. **PRODUCT LINE** DSNP and Medicare	**Medical record documentation:** The discharge information must include **all** of the following: • The practitioner responsible for the member's care during the inpatient stay. • Procedures or treatment provided. • Diagnoses at discharge. • Current medication list. • Testing results, or documentation of pending tests or no tests pending. • Instructions for patient care post-discharge. **Required Exclusion:** • Members in hospice or hospice services anytime during the measurement year.

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
TRC – Patient Engagement After Inpatient Discharge **Hybrid Measure** Documentation of patient engagement within 30 days after discharge. Do not include patient engagement that occurred on the date of discharge. **Eligible Population Event –** An acute or non-acute inpatient discharge on or between 1/1 and 12/1 of the measurement year.	Patient engagement occurs within 30 days after discharge. **PRODUCT LINE** DSNP and Medicare	**Claims:** • Submit a claim for patient engagement after discharge. **Medical record documentation*, any of the following meet criteria:** • An outpatient visit, including office visits and home visits. • A telephone visit. • A synchronous telehealth visit where real-time interaction occurred between the member and provider using audio and video communication. • An e-visit or virtual check-in (asynchronous telehealth where two-way interaction, which was not real-time, occurred between the member and provider). **Required Exclusion:** • Members in hospice or hospice services anytime during the measurement year.

UOP

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
UOP – Use of Opioids from Multiple Providers **Administrative Measure** The percentage of members 18 years and older, receiving prescription opioids for ≥15 days during the measurement year, who received opioids from multiple providers. **Three rates are reported:** 1. **Multiple Prescribers.** The percentage of members receiving prescriptions for opioids from four or more different prescribers during the measurement year. 2. **Multiple Pharmacies.** The percentage of members receiving prescriptions for opioids from four or more different pharmacies during the measurement year. 3. **Multiple Prescribers and Multiple Pharmacies.** The percentage of members receiving prescriptions for opioids from four or more different prescribers and four or more different pharmacies during the measurement year. **Note:** *A lower rate indicates better performance.* **Eligible Population Event:** Identify members who met both of the following criteria during the measurement year: • At least two or more opioid dispensing events on different dates of service. • ≥ 15 total days covered by opioids.	Assesses potentially high-risk opioid analgesic prescribing practices. **PRODUCT LINE** Commercial, Medicare and Medicaid	Members who received opioids from four or more different prescribers and four or more different pharmacies during the measurement year meet numerator compliance. **Medical record documentation not applicable.** **Required Exclusion:** The following opioid medications are excluded from this measure: • Members in hospice or using hospice services any time during the measurement year. **Note:** *The following opioid medication are excluded from this measure:* • *Injectables* • *Opioid cough and cold products* • *Single-agent and combination buprenorphine products used as part of medication assisted treatment of opioid use disorder* • *Lonsys (fentanyl transermal patch)* • *Methadone for the treatment of opioid use disorder*

URI

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
URI – Appropriate Treatment for Upper Respiratory Infection This measure is reported as an inverted rate. A higher score indicates appropriate URI treatment. **Administrative Measure** The percentage of episodes for members 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did **NOT** result in an antibiotic dispensing event. **The Intake Period:** 7/1 of the prior year to 6/30 of the measurement year.	Antibiotics will **NOT** be prescribed to members who are diagnosed with URI only. If there is another diagnosis which requires antibiotic treatment, include the coding information on the claim. **PRODUCT LINE** Commercial, Marketplace, Medicare and Medicaid	**Claims:** • Submit a claim for all additional competing diagnoses requiring antibiotic therapy on or within 3 days after the date of claim for URI. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year.

W30

HEDIS® QUALITY MEASURE	CLINICAL GOAL	CRITERIA TO MEET THE GOAL
W30 – Well-Child Visits in the First 30 Months of Life (Revised Measure Name from W15) **Administrative Measure** The percentage of members who had the following number of well-child visits with a PCP during the last 15 months. **Two rates are reported:** **Well-Child Visits in the First 15 Months:** Children who turned 15 months old during the measurement year: • Six or more well-child visits. **Well-Child Visits for Age 15 Months – 30 Months:** Children who turned 30 months old during the measurement year: • Two or more well-child visits.	Children should have 6 or more well-child visits during the first 15 months of life. Children who turn 30 months old during the measurement year should have 2 or more well-child visits between 15 and 30 months. **PRODUCT LINE** Commercial, Marketplace and Medicaid	**Claims:** • Submit a claim for all member visits with proper coding for the visit service. **Medical record documentation not applicable.** **Required Exclusion:** • Members in hospice or using hospice services anytime during the measurement year.

APPENDIX 1

BMI CODE CHART

ICD-10-CM CODES FOR WCC AGES 3 – 17 PER HEDIS SPECIFICATIONS
Z68.51 Body mass index (BMI) pediatric, less than 5th percentile for age
Z68.52 Body mass index (BMI) pediatric, 5th percentile to less than 85th percentile for age
Z68.53 Body mass index (BMI) pediatric, 85th percentile to less than 95th percentile for age
Z68.54 Body mass index (BMI) pediatric, greater than or equal to 95th percentile for age

APPENDIX 2

MEASURES THAT CAN ACCEPT MEDICAL RECORDS FOR CARE GAP CLOSURE

MEASURE ABBREVIATION	MEASURE NAME
CCS	Cervical Cancer Screening
CHL	Chlamydia Screening in Women
CIS	Childhood Immunization Status
COL-E	Colorectal Cancer Screening
EED	Eye Exam for Patients with Diabetes
GSD	Glycemic Status Assessment for Patients with Diabetes
IMA	Immunizations for Adolescents
TRC	Transitions of Care – MRP
OMW	Osteoporosis Management in Women Who Had a Fracture
PPC – Prenatal	Timeliness of Prenatal Care
PPC – Postpartum	Postpartum Care
WCC – BMI	Weight Assessment and Counseling for Nutrition and Physical Activity in Children and Adolescents – BMI Percentile
WCC – Nutrition	Weight Assessment and Counseling for Nutrition and Physical Activity in Children and Adolescents – Nutrition
WCC – Physical Activity	Weight Assessment and Counseling for Nutrition and Physical Activity in Children and Adolescents – Physical Activity

APPENDIX 3

MEASURES USED IN OVERALL MEDICARE STAR RATINGS

The Centers for Medicare and Medicaid Services (CMS) uses a five-star quality rating system to promote improvement in quality. The following weighted measures are utilized when calculating an overall Medicare Star Rating:

MEASURE	WEIGHT
Medication Adherence for Cholesterol (Statins)	3
Medication Adherence for Hypertension (RAS Antagonists)	3
Medication Adherence for Diabetes Medications	3
GSD – Glycemic Status Assessment for Patients with Diabetes > 9.0%	3
CBP – Controlling High Blood Pressure	3
PCR – Plan All-Cause Readmissions	3
OMW – Osteoporosis Management	1
COL-E – Colorectal Cancer Screening	1
FMC – Follow-Up After Emergency Department Visit for People with Multiple High-Risk Chronic Conditions	1
EED – Eye Exam for Patients with Diabetes	1
TRC – Transitions of Care	1
SPC – Statin Therapy for Patients with Cardiovascular Disease	1
SUPD – Statin Use in Persons with Diabetes	1
BCS-E -Breast Cancer Screening	1
KED - Kidney Health Evaluation for Patients with Diabetes	1

APPENDIX 4

CAHPS AND MEDICARE HOS INFORMATION

CAHPS (Consumer Assessment of Healthcare Providers and Systems) Survey: Evaluating the Patient's Experience

The CAHPS® survey evaluates the consumer's perspective of the quality of health services provided by Commercial, Medicare Advantage and Part D programs.

Below are some tips to addressing the CAHPS-specific patient experience factors:

- Be familiar with the questions patients are being asked on the member survey.
- Blue Cross and Blue Shield of North Carolina (Blue Cross NC) has changed the benefit for payment of the Medicare Advantage Annual Wellness Visit from once every 12 months to once per calendar year. This reconfiguration took effect January 1, 2021 and will remain in place until further notice.
- Encourage patients to get a flu shot each year.
- Understand patients' costs for prescribed drugs based on their plan formulary.
- Follow up with patients promptly regarding test results, regardless of whether the results require additional care.
- Prioritize timely appointment scheduling, for both routine and specialty care.

Medicare Health Outcomes Survey (HOS) 101: For Providers

The HOS member survey assesses the physical and mental health of patients over a two year period. Responses to this survey contribute to the plan's overall Star Rating. Many of the survey questions ask the patient if they have had conversations with their doctor or nurse about activity level, falls, and bladder control.

Best Practices for Providers:

- Be familiar with the questions patients are being asked on the member survey.
- Place reminders in your EMR to speak with patients at each visit regarding these topics:
  - Suggest that they use a cane or walker if needed.
  - Lying or standing blood pressure.
  - Exercise or physical therapy program recommendations.
  - Vision or hearing test (if necessary).
- Advise patients on ways to manage the leaking of urine, including bladder training exercises, medication and surgery.

APPENDIX 5

MEDICARE MEDICATIONS WITH $0 COPAY*

2024 Formulary Tier 6 Select Care Drugs – GENERIC DRUGS ONLY

*$0 copay at Preferred Retail Pharmacies and the following Preferred Mail Order Pharmacies:
AllianceRX Walgreens Pharmacy, Express Scripts, during the deductible, initial coverage and coverage gap phases.
(List of Preferred Retail Pharmacies available at BlueCrossNC.com/Find-a-Drug-or-Pharmacy.)

DRUG CLASS					
Angiotensin – Converting Enzyme Inhibitors (ACE-I)	**Angiotensin – Receptor Blockers (ARB)**	**Renin Inhibitors**	**Statins**	**Meglitinides**	**Biguanides**
Benazepril Benazepril / Amlodipine Benazepril / HCTZ Captopril Enalapril tablet Enalapril / HCTZ Fosinopril Fosinopril / HCTZ Lisinopril Lisinopril / HCTZ Moexipril Perindopril Quinapril Quinapril / HCTZ Ramipril Trandolapril Trandolapril / Verapamil ER	Candesartan Candesartan / HCTZ Irbesartan Irbesartan / HCTZ Losartan Losartan / HCTZ Olmesartan Olmesartan / Amlodipine Olmesartan / Amlodipine / HCTZ Olmesartan / HCTZ Telmisartan Telmisartan / Amlodipine Telmisartan / HCTZ Valsartan Valsartan / Amlodipine Valsartan / Amlodipine / HCTZ Valsartan / HCTZ	Aliskiren	Atorvastatin Atorvastatin / Amlodipine Fluvastatin (20 mg, 40 mg) Lovastatin Pravastatin Rosuvastatin Simvastatin Simvastatin / Ezetimibe	Nateglinide Repaglinide	Metformin tablet Metformin ER tablet** Metformin / Glipizide Metformin / Glyburide Metformin / Pioglitazone ** Metformin ER does not include generic Fortamet (Metformin ER osmotic release tablet) or Glumetza (Metformin ER modified release tablet).
COMMON USE					
BLOOD PRESSURE	**BLOOD PRESSURE**	**BLOOD PRESSURE**	**CHOLESTEROL**	**DIABETES**	**DIABETES**

DRUG CLASS					
Sulfonylureas	**Thiazolidinediones (TZDs)**	**Bisphosphonates**	**Endocrine / Metabolic Agents**	**Selective Estrogen Receptive Modulators (SERMS)**	**Disease-Modifying Anti-Rheumatic Drugs**
Glimepiride Glimepiride / Pioglitazone Glipizide Glipizide ER Glipizide XL Glipizide / Metformin Glyburide Glyburide Micronized Glyburide / Metformin	Pioglitazone Pioglitazone / Glimepiride Pioglitazone / Metformin	Alendronate tablet (10 mg, 35 mg, 70 mg) Ibandronate	Calcitonin nasal spray	Raloxifene	Azathioprine 50mg tablet Methotrexate Sulfasalazine
COMMON USE					
DIABETES	**DIABETES**	**OSTEOPOROSIS**	**OSTEOPOROSIS**	**OSTEOPOROSIS**	**RHEUMATOID ARTHRITIS**

APPENDIX 6

ELECTRONIC CLINICAL DATA SYSTEMS (ECDS) MEASURES

Electronic Clinical Data Systems (ECDS) Measures

- A structured method to collect and report electronic clinical data for HEDIS quality measurement and for quality improvement.
- HEDIS reporting standard for health plans collecting and submitting measures to NCQA. This reporting standard defines the data sources and types of structured data acceptable for use for a measure.
  - Data collection:
    - Personal Health Record (PHR) / Electronic Health Record (EHR)
    - Clinical Registry / Health Information Exchange (HIE)
    - Case management system
    - Admin / enrollment
  - Data must:
    - Use standard layouts
    - Meet the technical specifications
    - Must be accessible by the care team upon request
    - Elements reported according to data source

NCQA developed ECDS to encourage health information exchange, the secure sharing of patient medical information electronically.

Measures:

- Childhood Immunization Status (CIS-E)
- Immunizations for Adolescents (IMA-E)
- Breast Cancer Screening (BCS-E)
- Colorectal Cancer Screening (COL-E)
- Follow-Up Care for Children Prescribed ADHD Medication (ADD-E)
- Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E)
- Depression Screening and Follow-Up for Adolescents and Adults (DSF-E)
- Utilization of the PHQ-9 to Monitor Depression Symptoms for Adolescents and Adults (DMS-E)
- Depression Remission or Response for Adolescents and Adults (DRR-E)
- Unhealthy Alcohol Use Screening and Follow-Up (ASF-E)
- Adult Immunization Status (AIS-E)
- Prenatal Immunization Status (PRS-E)
- Prenatal Depression Screening and Follow-Up (PND-E)
- Postpartum Depression Screening and Follow-Up (PDS-E)
- Social Need Screening and Intervention (SNS-E)
- CCS-E Cervical Cancer Screening (CCS-E)
